Enjoy healthy food with BioFresh from Liebherr

Creative cooking with family and friends is a new trend in modern cuisine. And nowadays enjoying healthy meals is simple to achieve as fresh food provides all the vitamins, mineral nutrients and trace elements our bodies need everyday. Fresh foods supply energy, strengthen the immune system, boost metabolism and can help to put you in a good mood. The fresher the produce is when it is prepared, the greater the value to a healthy diet. It is important not only to buy really fresh food, but also to ensure its perfect storage at home.

Since not all types of food need the same temperature and

humidity conditions, Liebherr has come up with the additional temperature zone - "BioFresh" - where many types of food can be kept fresh for up to three times longer than in a traditional refrigerator compartment. This requires keeping the temperature accurately at 0°C combined with the ideal humidity. Fruit and vegetables, for example, stay fresher for longer in conditions of high humidity, while a dry environment is ideal for storing meat, fish and dairy products. With BioFresh not only is the appearance and fresh flavour maintained but - first and foremost - the valuable vitamins and minerals are preserved up to three times longer.

Experience exceptional freshness with BioFresh

The BioFresh safes guarantee the perfect climate for long term freshness. With the temperature maintained just above 0°C and with an ideal humidity level, fruit and vegetables, meat and fish retain their healthy vitamins, delicate aroma and appetising appearance up to three times longer than in a traditional refrigerator compartment. The state of the art BioFresh technology offers the perfect storage solution: the BioFresh drawers can be individually controlled as either HydroSafes with high humidity or as DrySafes with low humidity to enable versatile storage. In this way the ideal climate is provided for all types of produce.

Meat and dairy products

Low humidity and a temperature just above freezing point are the ideal storage conditions for meat and dairy products. BioFresh combined with the DrySafe setting provides just this type of climate and keeps it constant at all times.

Fruit and vegetables

Fruit and vegetables are best kept in the HydroSafe with high humidity. Precision electronics ensure that the temperature is maintained at just above 0°C, preventing damaging frostbite.

Fish

The ideal storage temperature for fish and seafood is at freezing point. At this temperature the BioFresh drawers keep fish fresh for a long period. For true fish enthusiasts, the new BioFreshPlus safes have separate electronics for an independent setting; in the upper compartment the temperature can be lowered to -2°C. Together with the DrySafe setting, this means that fish can be kept fresher for much longer.

Tropical fruits

With BioFreshPlus even temperature sensitive tropical fruits can be kept fresh, in the upper, adjustable safe they are stored in perfect conditions at +6°C and high humidity.

Flexibility with BioFresh

BioFresh is the technology for discerning, health-conscious people. With BioFresh many types of food stay fresher up to three times longer than in a traditional refrigerator compartment. To accomplish this, the temperature has to be kept accurately at just above 0°C, accompanied by the ideal humidity in the BioFresh safes. The BioFresh drawers can be used individually, as HydroSafes with high humidity or as DrySafes with low humidity to enable versatile storage.

The humidity control plates allow the humidity to be set individually in both compartments, enabling each to be used as either a HydroSafe or DrySafe.

In the PremiumPlus appliances the BioFresh compartments have LED lighting, ensuring an ideal, clear view of the food stored inside. The LED lighting is elegantly integrated into the side wall for a flush finish.

BioFreshPlus: for added flexibility

The new BioFreshPlus with separate electronics provides yet more flexibility for tailored storage. In the new BioFreshPlus appliances the upper BioFresh safe can be set to the exact degree needed for different food types: 0°C for meat and dairy products in the DrySafe, fruit and vegetables in the HydroSafe.

As the storage life of fish and seafood can be extended further at a temperature of -2°C, the new BioFreshPlus can be set to this lower temperature, compared to the standard BioFresh setting of 0°C.

BioFresh from Liebherr: the healthier option

The exceptional freshness that the BioFresh provides makes a significant contribution to a healthy diet. Two studies conducted by renowned research institutes* recently confirmed this. Their joint conclusion: food quality benefits markedly from BioFresh technology. How great are the benefits of a BioFresh safe for food freshness compared with storage in a traditional vegetable compartment? This was the question studied by the Lake Constance Research Centre for Fruit Cultivation and the German Federal Research Institute for Nutrition: the results spoke clearly in favour of BioFresh from Liebherr. The vitamin C values alone were on average 92 per cent higher. Some foods even showed an increase in the vitamin C content. Weight retention during storage was increased by 68.3 per cent on average. Wastage in preparation was also significantly reduced.

	Apples	Asparagus	Peppers	Broccoli	Carrots	Grapes	Lettuce	Average
Vitamin C (after 15 days)								
HydroSafe	100.3 %	78.2 %	161.6 %	88.3 %	82.9 %	134.4 %	26.6 %	104.4 %
Vegetable comp.	92.9 %	65 %	154.2 %	21.5 %	32.4 %	116.7 %	21.9 %	72.8 %
Difference	8 %	20 %	5 %	310 %	156 %	15 %	21 %	92 %
Weight (after 15 days)								
HydroSafe	-0.6 %	-4.8 %	-1.7 %	-3.8 %	-9 %	-0.6 %	-3.1 %	-3.1 %
Vegetable comp.	-1.1 %	-4.5 %	-2.8 %	-5.6 %	-12.8 %	-1.7 %	-5.9 %	-4.6 %
Difference	105 %	6 %	63 %	49 %	43 %	170 %	91 %	68.3 %

The power of freshness with BioFresh

Nutritionists recommend one simple recipe for fitness and well-being: a healthy diet. Nature offers a whole range of vital substances, vitamins, minerals, proteins and carbohydrates to give our bodies energy and stamina. A healthy diet can also put you in a good mood. However, the right temperature and ideal humidity conditions are essential if food is to retain its healthy properties and delicate flavours as long as possible. Liebherr's BioFresh technology gives your quality of life a decisive boost by keeping your food much fresher for much longer.

 Asparagus + 8 days *	 Scampi + 1 day *	 Carrots + 30 days *
 Raspberries + 2 days *	 Fish + 1 day *	 Artichokes + 7 days *
 Broccoli + 8 days *	 Lettuce + 8 days *	 Grapes + 17 days *

*This information relates to storage in a BioFresh compartment compared with a traditional refrigerator compartment.

Fridge-freezers and refrigerators with BioFresh

The BioFresh fridge-freezers with their three climate zones provide plenty of space for fresh food, as do the BioFresh refrigerators. The spacious refrigerator compartment with height-adjustable glass shelves and the door interior allowing versatile use are ideal for cooling food. The large BioFresh safes offer ample storage for your fresh produce. With a temperature maintained just above 0°C and the ideal humidity level, food such as fruit and vegetables, meat and fish stay fresh up to three times longer. The NoFrost freezer compartment of the combined appliances provides professional long term freshness along with the convenience of never having to defrost again.

Harmonious design elements, such as GlassLine shelves and door racks, high quality stainless steel trims, the new stainless steel slimline door handle or the integrated electronic controls with Touch-electronics provide high quality down to the smallest detail.

The new **PremiumPlus electronic LCD display** is an innovative design feature. Clear menu navigation and a Touch-electronic control system provides yet more information for tailored storage conditions. The Touch-electronic navigation ensures easy selection and use of the numerous control functions.

Hallmarks of the PremiumPlus range are two **light columns** integrated into the liner on either side, inside each are numerous LEDs

ensuring uniform illumination of the interior.

The **IceMaker** provides you with a constant supply of ice cubes for every occasion. Whether you fancy a cold drink or you're having a big party, the IceMaker automatically keeps your supplies topped up.

The innovative Touch-electronic system, guarantees that the temperatures selected are kept to the exact degree required. All the functions can be set simply and with ease on the **LCD display** by tapping on the Touch-electronic control panel.

Nearly all the stainless steel doors come with a **SmartSteel** surface. SmartSteel significantly reduces the visibility of finger marks and

thanks to the high-quality finish of the stainless steel, is very easy to clean and far more scratch-resistant.

The removable **VarioBoxes**, designed for convenient storage, can be rearranged in the door interior to suit your requirements. VarioBoxes hang on a steel rod and are detachable.

Fresh & Fit made simple

Fresh, healthy products give your body everything needed for vitality, stamina and a sense of all-round well-being. Day in, day out fruit and vegetables with their high vitamin content make a vital contribution to a healthy lifestyle. And the right mix delivers the best results for good health – every natural product has its own special properties. To optimally preserve them, fruit and vegetables need the right environment: just above 0°C in the BioFresh HydroSafe.

Strong partners: vitamins and olive oil

Fresh salad every day gives the body lots of healthy vitamins. There's a simple rule you can follow: the more colourful, the healthier it is! This is because colours are indicative of various substances in salad and vegetables. The most important accompaniment for salad is olive oil. Thanks to the high proportion of mono-unsaturated fatty acids and natural antioxidants, olive oil protects the arteries and so naturally guards against heart disease. Olive oil has a high vitamin E content and also contains vitamins A and D. These vitamins strengthen the immune system, nourish hair, provide strong nails and healthy skin.

	VITAMIN	FUNCTION	SOURCE	STORAGE LIFE
	Vitamin A	strengthens the immune system, promotes good vision, promotes children's growth and strengthens the teeth	carrots, kale, fennel, spinach, lamb's lettuce, broccoli, apricots, sugar melon	e.g. carrots Vegetable comp.: 50 days HydroSafe: 80 days
	Vitamin B2	for clear and healthy skin, protects the nerve cells, is important for vision, boosts energy supply of the cells	yellow peppers, kale, broccoli, avocados, mushrooms, porcini mushrooms	e.g. mushrooms Vegetable comp.: 3 days HydroSafe: 7 days
	Vitamin B5	promotes the growth of hair and hair pigmentation, helps to restore equanimity, wards off infection	strawberries, blackcurrants, apricots, cauliflower, broccoli	e.g. strawberries Vegetable comp.: 3 days HydroSafe: 7 days
	Vitamin B6	activates the immune system, supports nerve function, increases energy and stamina, keeps muscles and helps reduce stress	beans, spinach, potatoes, broccoli	e.g. broccoli Vegetable comp.: 5 days HydroSafe: 13 days
	Vitamin C	boosts the immune system, increases the production of collagen and so maintains healthy skin, assists cell regeneration, promotes a sense of general well-being	peas, kale, artichokes, asparagus, peppers, onions, cabbage, raspberries	e.g. raspberries Vegetable comp.: 1 day HydroSafe: 3 days
	Vitamin E	is regarded as the "anti-aging vitamin": counteracts aging processes, strengthens the immune system, hinders the formation of deposits in blood vessels	fennel, peppers, brussel sprouts, tomatoes, white beans, asparagus, lettuce,	e.g. salad Vegetable comp.: 5 days HydroSafe: 13 days
	Vitamin K	promotes vitality, supports healthy bone structure, assists the optimal utilization of carbohydrates	chicory, carrots, brussel sprouts, lettuce, cauliflower, peas, broccoli	e.g. peas Vegetable comp.: 7 days HydroSafe: 14 days

Side-by-Side: freshness on a grand scale

Whether for the family or with friends, the kitchen is increasingly becoming the meeting point and hub of modern households. Liebherr's Side-by-Side fridge-freezers are perfect for storing large quantities of vitamin-rich food. They are extremely spacious and uniquely convenient. Their exclusive design will make them the highlight of any kitchen. Every detail - from the door handle to the shelves - is of the very highest quality.

The new SBSes 7155 Side-by-Side offers five different climate zones and an array of innovative solutions. In the **wine storage section**, wines can be stored in two independently controlled zones at exactly the degree required between +5°C and +20°C.

Our innovative **SoftSystem** is integrated into the door to cushion movement as the door is closed, ensuring that it closes gently even if

the door interior is fully loaded. The door closes automatically from an opening angle of about 45°.

The precision **Premium electronic control system behind the door** with the innovative Touch-electronic control concept ensures that temperatures are kept to exactly the degree selected. All the functions can be set with great ease in the LCD display by simply tapping on the Touch-electronic control panel.

Supplying ice cubes, crushed ice and chilled water, the new **IceCenter** provides a myriad of options for serving cool drinks. A cold water reservoir with water filter is integrated in the refrigerator compartment for the ideal chilled water temperature. The dispenser unit is incorporated into the door, with Touch-electronic controls.

The interior **GlassLine equipment** has a sectioned shelf with slide under half shelf option to quickly create space for tall containers.

In addition, the satin finished shelves and door racks are all height adjustable.

Giving an ideal view of the freezer compartment. Integrated in the electronic panel is an **LED light source** illuminating the extended drawers with transparent front to give an even better view of the food stored inside.

Well-being with confidence

Vitamins and minerals are vital for your continued well-being. They promote the regeneration of the skin, ease tension, boost stamina and the power of concentration, give hair a shine and strengthen the fingernails. Vitamin and mineral functions:

Calcium maintains strong teeth and promotes skin regeneration processes, especially after sun exposure

Biotin strengthens fingernails and hair

Potassium strengthens the cardiovascular system, has an activating effect on enzymes and balances body fluids

Iodine activates thyroid function and so gets the metabolism going and increases the power of concentration

Phosphorus activates metabolism, strengthens bones and teeth

Iron promotes blood formation and oxygen transport, also contributing to the efficiency of the immune system

Magnesium improves muscle performance and endurance, promotes equanimity

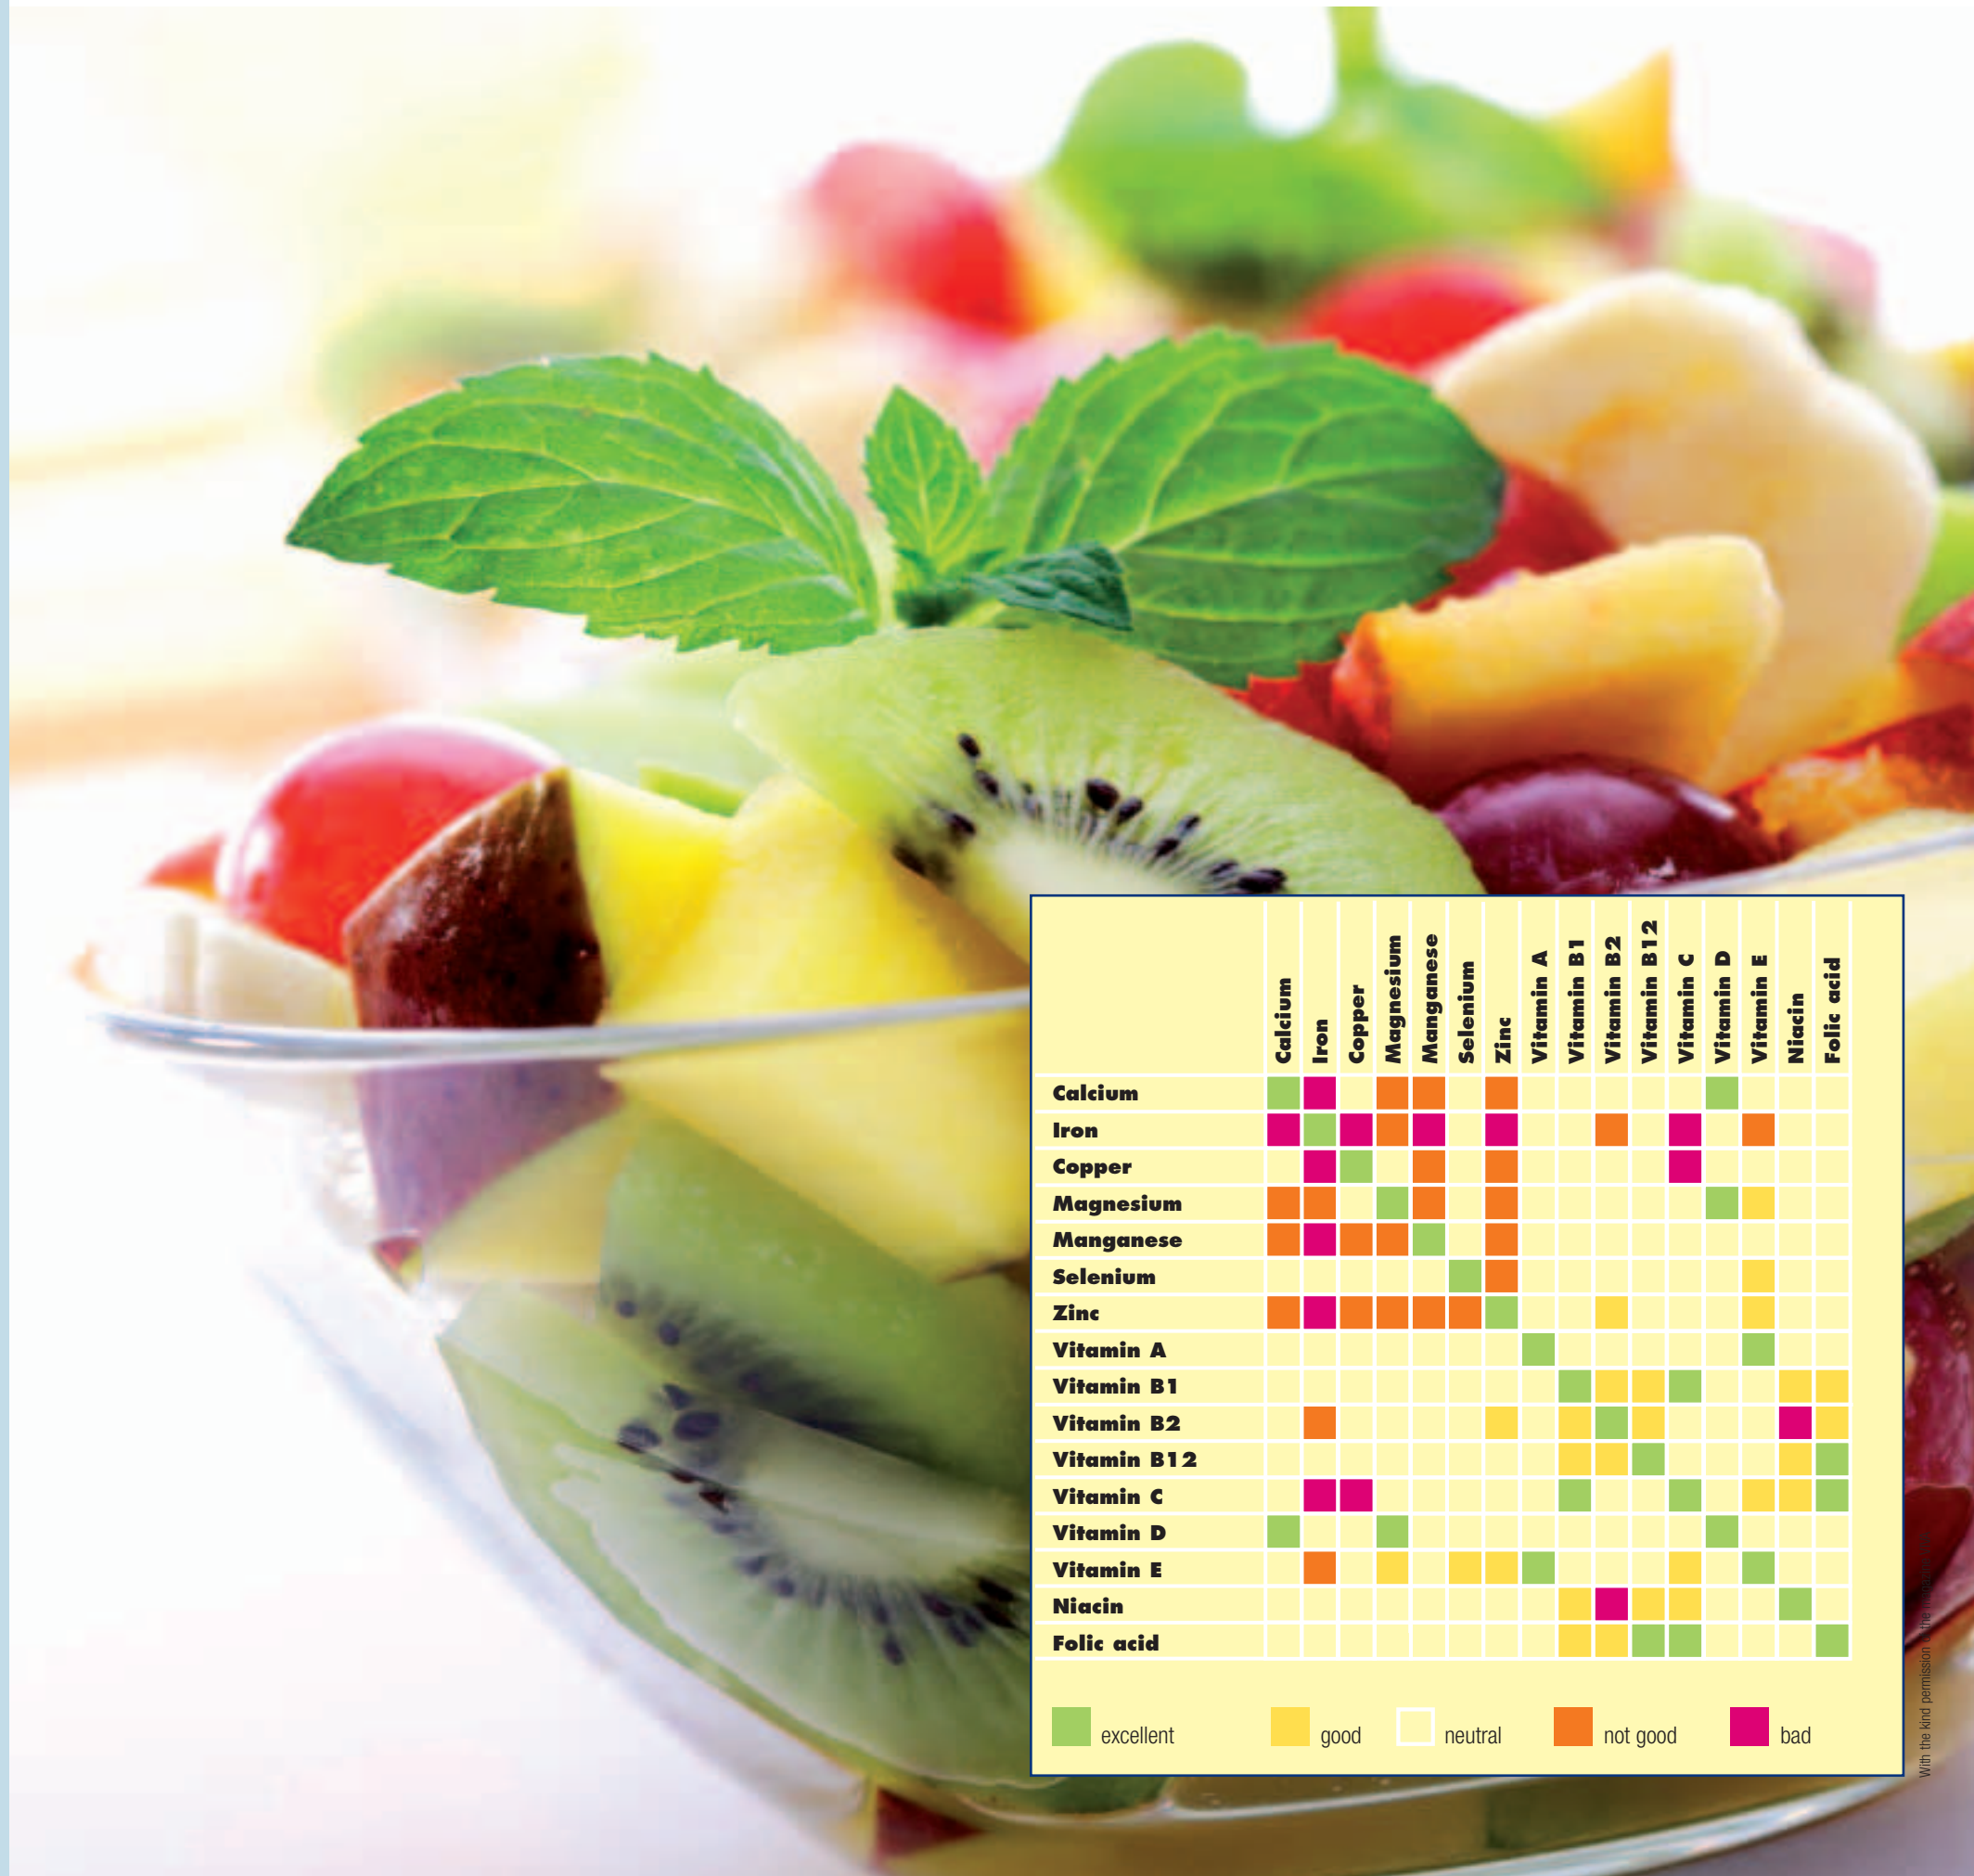

Selenium is beneficial for the cardiovascular system and activates the body's immune system

Zinc promotes a strong immune system, supports a healthy drive and bolsters the ability to cope with stress

Fluorine strengthens dental enamel and makes teeth more resistant

Copper supports the formation of elastin and collagen in connective tissue, it gives skin and hair a healthy colour

Not all nutrients are equally compatible. The table sets out the main interactions between vitamins and minerals and provides assistance on which substances go together well.

Built-in fridge-freezers and refrigerators with BioFresh

Liebherr offers an extensive range of BioFresh appliances for integrated use, tailored to the needs of today's modern lifestyle. The rail-mounted BioFresh drawers are integrated to be almost flush with the compartment liner. These appliances come in two versions: the Premium range and the PremiumPlus range.

Hallmarks of the BioFresh models in the PremiumPlus range are two light columns integrated into the liner. With one on either side, there are numerous LEDs ensuring uniform illumination of the interior.

The special satin finish of the light cover creates a pleasant lighting atmosphere. Their slimline, smooth contours mean that the two light columns blend harmoniously with the interior, while permitting re-arrangement of the glass shelves for storage flexibility. The freezer in the PremiumPlus range also features LED lighting for an even better view of the food stored inside.

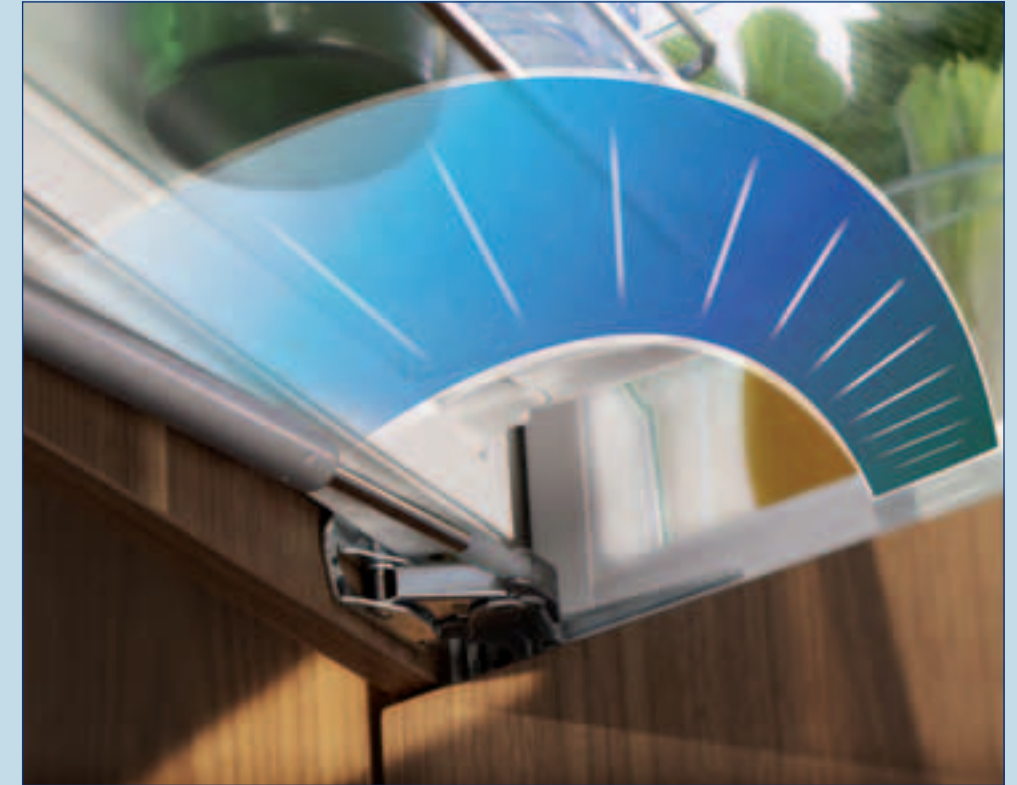

Hallmarks of the PremiumPlus range are two **light columns** integrated into the liner on either side, inside which there are numerous **LEDs** ensuring uniform illumination of the interior. The special satin finish of the light cover creates a pleasant lighting atmosphere.

An innovative and unique detail is the **integrated bottle shelf**. Should you need to store very tall bottles, the bottle rack in the door can be moved

upwards allowing the entire depth of the appliance to be used. Alternatively, the integrated bottle rack under the glass shelf can be used.

The **SoftSystem** is integrated in the door to cushion movement as the door is closed, ensuring the door closes gently even when door interior is fully loaded.

The door will close automatically from an opening angle of around 30°.

A new feature in all the BioFresh models is the clearly laid out, precision control system with **MagicEye**, ensuring that the digitally displayed temperature you select is the temperature within the appliance. The layout of the controls makes for easy and convenient use.

In the new combined BioFresh fridge-freezers of the PremiumPlus range, the freezer compartment now features lighting. Integrated above the BioFresh drawers is a **LED light strip** ensuring

ideal illumination of the opened, transparent drawers to give you an even better view of the stored food.

Liebherr's **NoFrost** appliances provide expert refrigeration technology for securing long-term freshness. The food is frozen with chilled forced air and any humidity generated is quickly expelled. As a result, the freezer is always free from ice and the food never frosts over. With NoFrost defrosting is a thing of the past.
