Create your own space!

Key Features

Anywhere Carry Case

The box is detachable, so you can remove and replace it easily. You could keep jams, dressings and sauces in it as your dining set and take the entire box to the table when you eat. Or you could store cooking seasonings in it and take the whole box to the counter when you cook. Use the box as it suits you!

Free Movable Tray-Shelf

The special tray-shelf is for the freezer compartment. It is movable and can be used in various ways. You can make two levels, enabling you to store food separately. If used upside down, you can keep frozen foods neatly within the tray-shelf. Use it any way you wish!

Organize food

Within the tray!

Make two levels!

Short items Tall items

Half Pair Tempered Glass Tray

A shelf split into two trays. You can remove half of the tray to obtain more space. Tall items such as a drink decanter or a pot twice as large can be accommodated. Furthermore, the trays are made of a durable tempered glass that can tolerate the weight of even heavy foods.

Sophisticated Appearance

The door is designed in asymmetric, two-tone color, eliciting an elegant contrast. The featured vertical handles are easy to grip. They also blend with the sleek lines to give you a refrigerator that adds a touch of sophistication to your kitchen.

Nano-Deodorizer

The deodorizer contains molecules that are as small as nano-sized. Odor molecules, however, are much bigger than the nano-size molecules, so when air passes through the filter, the nano-level molecules catch the odor molecules firmly. This helps reduce odors inside the refrigerator.

Temperature Control Light

The brightness of the light next to the control indicates the temperature level visually, allowing you to ascertain the level easily. An electronic control finely adjusts the temperature inside the refrigerator based on the set temperature.

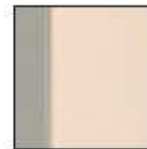

Extensive Line-up

Our all-inclusive model line gives you a wide range of capacities and colors to choose from.
