

Small appliances

No home is complete without those indispensable devices that perform your daily chores. From making a refreshing cup of tea, to perfect toast and coffee as good as you'll find anywhere in Italy. And now, with our new Z.60 vacuum cleaners, you have another Siemens appliance to help you tackle tasks and chores with elegant efficiency, day in day out.

Our new EQ7 Machine. The Italians have a word for it – **Perfetto.**

In creating the EQ7, we've not only made a quantum leap in the area of fully automatic espresso machines, we have practically reinvented the art of espresso making. We set ourselves a question: how do you create the perfect espresso? To find the solution, we picked over every last detail of the espresso making process. Did we succeed? With the EQ7 we have created a completely new espresso world, closing the circle from bean to cup to provide the ultimate flavour experience. In the EQ7, you have at your fingertips not only the fastest and most efficient appliance of its kind, but also a machine where the technology is more than just brand new; it's revolutionary. The EQ7, the future of fully-automatic espresso machines.

Perfect flavour

Astonishingly, there are 800 sub-flavours in a cup of espresso, and for it to achieve perfection they must be allowed to unfold fully. For this to happen, the water must be sustained at the ideal temperature for 30 seconds during the brewing process. With our new **Senso Flow System**, this is now possible, giving you perfect flavour every time and anytime. And with minimal heat up time and minimum standby power, it's also a unique, energy-saving feature.

Perfect design

Espresso connoisseurs who are enthralled by the entire espresso-making process will love the transparency and intuitive operation of the EQ7. As well as drawing attention to the bean container and the water tank, an innovative lighting concept highlights the individual stages of the entire process. And the outstanding 360-degree design means it works perfectly as a freestanding unit.

Perfect crema

A golden-brown, creamy and long-lasting crema is the trademark of a really good espresso. To achieve this a constant pressure is key in extracting the maximum flavour from the beans. Preparing espresso requires the talents and instinct of a first class barista. With the EQ7, we have built those skills into the very fabric of the machine.

The 'aroma pressure system' automatically achieves the ideal, continuous pressure and therefore the perfect brewing result, for every single cup. The tamper has been designed with a convex shape, that allows even more flavour to be released from the ground coffee. So no matter how much coffee you use, you'll always end up with the perfect crema. Automatically.

Perfect simplicity

A fine milky foam, frothy as lightly whipped cream. That's the basis of the ultimate cappuccino. The ingenious swivel arm is simplicity itself to use and an optimised swirling process inside the milk nozzle produces the ultimate in fine, milky foam for the perfect result every time.

We also brought a lot of in-depth thinking to the subject of milk. The result – completely new product ergonomics and a totally separate milk system separate from the coffee part.

Our Surpresso bean to cup machines. Coffee doesn't really come much fresher.

The TK69009GB features unique piano black finish, an easy to use programmable display, a unique AutoCappuccino frothing nozzle, milk container and built-in water filter and maintenance kit for the finest results with every cup of coffee.

Freshly ground coffee

The integrated coffee mill inside the bean to cup machines grinds the coffee beans as finely as you wish and fills the brewing chamber with ground coffee to the required level. Once the coffee is in place, the brewing chamber is hermetically sealed and the coffee is compressed. The hot water is then pumped into the chamber and the brewing process starts.

All models have coffee and cup filling levels that can be accurately adjusted. At the top of the appliance is a cup stand with pre-warming facility and the drip tray catches anything once the cup has been removed.

Multi-lingual digital display

Our machines have several easy to operate programmable functions that include a choice of 8 languages, a water hardness setting, a cup warming plate and de-scaling.

AromaWhirl system

With conventional high-pressure methods, the water takes the easiest route through the ground coffee and in doing so, extracts a correspondingly high quantity of flavour. With the AromaWhirl system the ground coffee and water are whirled around the brewing chamber to extract more flavour than ever.

It's not just design, it's Porsche Design.

It's the striking design that sets Siemens appliances apart from the rest of the market. The high tech looks match the high tech features, from the fabulous coffee machine to the matching set of kettle and toaster.

Toaster

Its unique dust cover floats back at the touch of a button. The residual time indicator on a digital display counts down the minutes and seconds until your toast is done and the integrated bun warming rack is perfect for heating croissants, muffins or bread rolls.

Kettle

A soft pop-up lid and specially shaped spout mean you can fill through either the spout or the lid. The cord storage winder is in the base so that you don't have excess cable trailing on the worktop.

Filter coffee maker

The unique swing out serving position lets you know when the coffee is ready. It has a removable water tank for easy filling and a hassle-free de-scaling function to keep your coffee tasting just right.

Our new Z6.0 vacuum cleaners. So powerful, so efficient, so Siemens.

The ultimate in performance and efficiency, the new Z6.0 vacuum cleaners offer a new dimension in floor care. They are equipped with the most advanced aerodynamic system of any vacuum cleaner in the world. Which means ultimate performance and ultimate efficiency. They are the perfect machines for people who admire design and technology and who want elegant looks combined with outstanding performance.

Efficient air dynamics

The Z6.0 is the first product in a new generation of Siemens technology with "Efficient Air Dynamics", an outstanding aerodynamic system setting new standards in terms of performance.

To achieve these levels, every aspect of the machine has been taken into consideration and is equipped with:

20% bigger hose diameter at the hose connection

Bigger hose diameter beginning at the handle

25% more filter surface (Hepa and motor protection) for an increased air flow

50% more filter surface in the dust bag and improved filter materials

An improved air guidance system

Two models

The Z6.0 comes in two variants.

ECO

The ECO is powered by a compressor motor that uses half the energy of a comparable cleaner. It comes with a turbo floor brush, an adjustable floor tool, a crevice nozzle, upholstery nozzle and dusting brush. It offers HEPA filtration and its self-sealing hygiene bags have a capacity of 5 litres.

POWER

A 2500W high performance motor gives the POWER ultimate performance... fantastic dust pick-up... and highest airflow. Like ECO, it comes with a turbo floor brush, an adjustable floor tool, a crevice nozzle, upholstery nozzle and dusting brush and also offers HEPA filtration and its 5 litre self-sealing hygiene bags. Also includes mini turbo tool.

The RD296 nozzle with metal sole

This specially designed attachment gives both machines an excellent pick up rate.

Fully automatic bean to cup coffee centre

Fully automatic bean to cup coffee centre TK76009GB

Piano black finish
Chrome buttons and rotary knobs
BSH Brita water filter cartridge

One Touch Function – café latte, cappuccino and white coffee at the touch of a button
Also makes espresso, café crema and Americano

“My Coffee” Function – allows you to programme and save your own perfect cup of coffee. With customisable coffee strength, cup size and even the percentage of espresso and milk, you really can set up your EQ7 to make your perfect cup of coffee every time

Aroma Pressure System – intelligent brewing chamber for optimum flavour extraction

Silent Ceram Drive – perfect taste with every cup, quiet operation and consistent grinding performance

Senso Flow System – perfect enjoyment with every cup, fastest first cup on the market, low energy consumption

Single Portion Cleaning – rinses automatically after every drink

Programmable functions including:
“My Coffee”, auto off function, choice of 8 languages, water hardness setting, brewing temperature and de-scaling programme

Cup size and coffee strength selectable
Fits all cup sizes from espresso cups to café latte glasses
Removable 2.1 litre water tank
Cup warming plate for pre-heating cups
Bean capacity 300g
Hot water function
Can be used with ground coffee

Easy to use graphic display
Thermally insulated milk container for hygienic and fresher milk storage – 0.7 litre capacity

Very easy to clean and maintain

Includes starter kit with cleaning and de-scaling tablets and water hardness testing strips

Dimensions: 385 H x 320 W x 445 D mm
19 bar pump pressure

Fully automatic bean to cup coffee centre

Fully automatic bean to cup coffee centre TK73001GB

Silver finish

One Touch Function – café latte and cappuccino at the touch of a button
Also makes espresso, café crema and Americano

Aroma Pressure System – intelligent brewing chamber for optimum flavour extraction

Silent Ceram Drive – perfect taste with every cup, quiet operation and consistent grinding performance

Senso Flow System – perfect enjoyment with every cup, fastest first cup on the market, low energy consumption

Auto off function, choice of 8 languages, water hardness setting, brewing temperature and de-scaling programme

Cup size and coffee strength selectable
Fits all cup sizes from espresso cups to café latte glasses
Removable 2.1 litre water tank
Cup warming plate for pre-heating cups
Bean capacity 300g
Hot water function
Can be used with ground coffee

Easy to use graphic display
Separate milk container in acrylic glass for extra hygiene

Very easy to clean and maintain

Includes starter kit with cleaning and de-scaling tablets and water hardness testing strips

Dimensions: 385 H x 320 W x 445 D mm
19 bar pump pressure

Fully automatic bean to cup coffee centre

Fully automatic bean to cup coffee centre TK69009GB

Piano black finish

For Americano, espresso, cappuccino and café latte

Aroma Whirl brewing chamber for optimum flavour extraction

Easy to use dialogue display

Cup size, coffee strength selectable

Grinding degree adjustable

Auto Cappuccino milk frothing nozzle for cappuccino and café latte

Height adjustable nozzle means all cup sizes fit including café latte glasses

Programmable functions for: on/off timer, water hardness, language and descaling programmes

Cup warming plate for pre-heating cups

15 bar high pressure thermo block system

Coffee bean container for 250g fresh beans, with aroma retaining lid

Separate container for pre-ground coffee

Removable water tank – 1.8 litre capacity

Separate milk container

Water filter

Single serving rinse cleaning programme

One step de-scaling programme

Includes starter kit with cleaning and de-scaling tablets, coffee measuring spoon and water hardness testing strips

Dimensions: 340 H x 270 W x 490 D mm

1400 watts

Fully automatic bean to cup coffee centres

Fully automatic bean to cup coffee centre TK54001GB

Silver finish

For Americano, espresso, cappuccino and café latte

Aroma Whirl brewing chamber for optimum flavour extraction

Easy to use symbol display

Cup size, coffee strength selectable

Grinding degree adjustable

Milk frothing nozzle for cappuccino and café latte

Cup warming plate for pre-heating cups

15 bar high pressure thermo block system

Coffee bean container for 250g fresh beans, with aroma retaining lid

Separate container for pre-ground coffee

Removable water tank – 1.8 litre capacity

Single serving rinse cleaning programme

One step de-scaling programme

Includes starter kit with cleaning and de-scaling tablets, coffee measuring spoon and water hardness testing strips

Dimensions: 340 H x 260 W x 450 D mm

1400 watts

Fully automatic bean to cup coffee centre TK58001GB

Same specification as TK54001GB but with the following additional features:

- Dolphin grey finish
- **Milk Whirl** system for easy preparation of café latte and cappuccino
- Cup stand illumination
- Programmable stand by mode for low energy consumption
- 1400 watts

Kettle and toaster by Porsche Design

Kettle by Porsche Design TW911P2GB

Brushed aluminium with black trim finish
1.5 litre capacity
Cordless with multi-directional base
Thermally insulated cool touch body

Illuminated blue LED on/off switch
Double sided water level indicator
Stainless steel filter in spout
Easy to fill through spout or lid

Soft eject lid
Safety locking lid
Cord storage

Dimensions: 277 H x 220 W x 146 D mm
2400 watts

Toaster by Porsche Design TT911P2GB

Brushed aluminium with black trim finish
Long-slot, two slice
Quartz heating element with variable
electronic browning control

Cancel button with integrated blue LED
Safety switch off if knocked over
Cool touch exterior
Residual time indicator

Soft lift mechanism
Integral rack for bread rolls
Unique dust cover
Cord storage

Dimensions: 250 H x 395 W x 130 D mm
1000 watts

Filter coffee maker by Porsche Design

Filter coffee maker by Porsche Design TC911P2GB

Brushed aluminium with black trim finish
Vacuum flask for up to 8 cups

Illuminated blue LED switches with separate
on/off button
Removable water tank
Coffee strength selector
Aroma retaining lid on vacuum flask
Drip-stop system and automatic shut-off

Unique swing out "serving position"
Permanent stainless steel filter
Stainless steel heating element
De-scaling programme
Cord storage

Dimensions: 405 H x 330 W x 282 D mm
1100 watts

Vacuum cleaner

Vacuum cleaner VSZ62545GB

Siemens **Z6 Power** – The Ultimate Performance
Lacquered red and silver finish

2500 watt high performance motor gives the **Z6 POWER**
the ability to tackle the toughest tasks with ease

HEPA filtration
Turbo floor brush
Mini turbo tool
Additional adjustable floor tool

3 integrated tools to make cleaning easier –
crevice nozzle, upholstery nozzle and dusting brush

5 litre capacity dust bags
Self sealing hygiene bags
13 metre operating radius
9.5 metre cable length

Dimensions: 238 H x 307 W x 503 D mm
2500 watts

Vacuum cleaner

Vacuum cleaner VSZ61245GB

Siemens **Z6 Eco** – The Ultimate Efficiency
Graphite and silver finish

1200 watt motor with the same performance
as similar 2400 watt models

Energy efficient compressor motor – uses 50%
less energy with no loss of performance
HEPA filtration
Turbo floor brush
Additional adjustable floor tool

3 integrated tools to make cleaning easier –
crevice nozzle, upholstery nozzle and dusting brush

5 litre capacity dust bags
Self sealing hygiene bags
13 metre operating radius
9.5 metre cable length

Dimensions: 238 H x 307 W x 503 D mm
